

### UNIVERSITY OF SPLIT

SCHOOL OF MEDICINE

## DETAILED PROPOSAL OF THE STUDY PROGRAM

## INTEGRATED UNDERGRADUATE AND GRADUATE UNIVERSITY STUDY PROGRAM

## MEDICAL STUDIES IN ENGLISH

SPLIT, December, 2014

# GENERAL INFORMATION OF HIGHER EDUCATION INSTITUTION

Name of higher education institution	University of Split School of Medicine
Address	Šoltanska 2; 21000 Split; Croatia
Phone	021 557-902
Fax	021 557-895
E.mail	diana.raos@mefst.hr
Internet address	www.mefst.hr

### **GENERAL INFORMATION OF THE STUDY PROGRAMME**

Name of the study program	Medical Studies in English					
Provider of the study program	University of Split School of Medicine					
Other participants	No other participants					
Type of study program	Vocational study pr	ogram 🗆	University stud	ly program ⊠		
Level of study program	Undergraduate 🗆	Graduate 🗆		Integrated 🖂		
	Postgraduate 🛛	Postgraduate specialist 🗆		Graduate specialist $\Box$		
Academic/vocational title earned at completion of study	Medical doctor (MD	))				

### 1. INTRODUCTION

#### **1.1.** Reasons for starting the study programme

USSM recognised an increasing need for international openness, mobility programs and international cooperation. Aiming to enhance international openness, Medical Studies in English yields all of its benefits. The Program was established in 2011/2012 academic year and enrols 50 students every year (there was an increase in enrolment quota from 30 to 50), which is in accordance with labour market needs. There is an insufficient number of medical doctors in certain areas in Croatia (islands, rural areas, etc.). The Program positively affects both the educational system and Croatian economy. Students from all over the world apply to our program, even though the majority of our students are from EU countries (such as Germany and Scandinavian countries). The program results in worldwide recognition of our medical educational system.

## 1.2. Relationship with the local community (economy, entrepreneurship, civil society, etc.)

Local community (economy, entrepreneurship, civil society, etc.) benefits from Medical Studies in English program due to students' living costs which extend up to 6 years' period. A number of students who are educated at USSM in Medical studies in English might become medical doctors serving our local community.

#### **1.3.** Compatibility with requirements of professional organizations

- 1. Medical studies in English Program is in accordance with Croatian professional Association the Croatian medical chamber
- 2. Upon graduation it is guaranteed that a person has acquired the following competences:
  - Understanding of science and scientific methods including principles of biological functions, estimation of scientific facts and data analysis
  - Understanding of structure and functions of healthy and ill patients as well as the connection between health and physical/social environment
  - Mastering of clinical procedures
  - Performance of clinical procedures supervised in hospital institutions

## 1.4. Name possible partners outside the higher education system that expressed interest in the study programme

Partents who have expressed interest in our study include:

Clinical Hospital Centre Split, Spinčićeva 1 and Šoltanska 1 Community Health Centre of Split – Dalmatia County, Kavanjinova 2 Department of Emergency Medicine of Split-Dalmatia County, Spinčičeva 1 Clinical Hospital Centre Split Split physical rehabilitation centre, Marmontova 4 Dental Clinic Split, A. G. Matoša 2 General Hospital Dubrovnik, Dr. Roka Mišetića 2 General Hospital Zadar, Bože Peričića 5 *Psychiatric hospital Ugljan.* Otočkih dragovoljaca 42 *Psychiatric hospital Rab, kampor 224* Split-Dalmatia County Pharmacy Split, Mihanovićeva 35 i Table 21

#### 1.5. Financing

Medical Studeis in English Program is not financed by the Croatian Government. All costs are covered by independent financial means (annual tuition fees and application fees).

## 1.6. Comparability of the study programme with other accredited programmes in higher education institutions in the Republic of Croatia and EU countries

We have looked up to German medical universities for the most part (Chenot J.-F. Undergraduate medical education in Germany. GMS German Medical Science. 2009;7:1-

11.) since Medical Studies in English Program is organized in the same way as the Medicine program in Croatian. The University in Heidelberg was of special interest to us since it is oriented towards teaching and conducting of scientific research, high-quality diploma thesis writing and flexibility of clinical rotation organisation.

In relation to other EU Universities, we have looked up to Scandinavian universities in terms of:

- a) Verticalization of courses (clinical skills courses)
- b) Verticalization of clinical medical humanities courses ( Lausane and Vilnius universities)
- c) Verticalization of research of biomedicine and health courses our medical school was the first to verticalize this course
- d) Psychological medicine course (School of Medicine in London (King's College), Glasgow, Cardiffu, the Netherlands – Utrecht, Belgium – Antwerpen, Sweden – Göteborg)
- e) Familiy medicine (University of Ljubljana, Slovenian professor Igor Švab is professor at our school of medicine as well)
- f) Medical Immunology and genetics (University of Edinburgh)
- g) Laboratory Diagnostics (University of Padova, 1st Medical faculty Charles University, Prag)
- h) Gerontology is recommended as an undergraduate course and we have implemented basic gerontology into Internal medicine course (World Health Organization, International Association of Gerontology and Geriatrics, Geriatric Medicine: basic contents for Undergraduate Medical Teaching)
- i) We have implemented naval Medicine into our 5<sup>th</sup> year course Occupational and Naval Medicine with Environmental Health. We are the first European country to implement Naval Medicine into an obligatory course.

## 1.7. Openness of the study programme to student mobility (horizontal, vertical in the Republic of Croatia, and international)

Due to program differences it is very difficult to find partner universities where our students would attend compatibile courses within a given time period. Even ERASMUS mobility program does not offer a solution to this problem since it requires students to attend universities abroad for 3 months.

Medicine program in Croatian has enabled students to work abroad and attend their electives during summer. We aim to do the same thing for our international students since that is more practical option.

# 1.8. Compatibility of the study programme with the University mission and the strategy of the proposer, as well as with the strategy statement of the network of higher education institutions

Medical Studies in English program is compatible with the University mission and the strategy of the school of medicine.

The University mission is to contribute to the society through development of higher education and lifelong learning programs, high quality research and scientific activities, art and professional wok in accordance with work ethics.University fo Split as a public university considers knowledge to be public good which is constantly carried out and enhanced through innovation and its implementation in local community, especially economy. Knowledge enhancement is the basis of University strength and autonomy. The key effort is to motivate students to engage into scientific work, education and innovation in order to make them pioneers in their fields.

University of Split strategy is based on the following documents:

- European strategy for smart, sustainable and inclusive growth, EUROPA 2020
- Strategy document European Research Area, ERA
- Strategy document European Higher Education Area, EHEA
- Strategy of education, science and technology, the Republic of Croatia

#### **1.9.** Current experiences in equivalent or similar study programmes

Medical education in Split began in 1974., when the University of Zagreb School of Medicine established the 4<sup>th</sup> and 5<sup>th</sup> years of medicine program in Split. The complete five year study program began in 1979. The University of Split School of Medicine was established as an independent university in 1997.

Medical studies in English Program was established in 2011. University of Zagreb School of Medicine is the only school to deliver Medical Studies in English Program as well. Even though Medical studies in English Program is the first international program at our University, it reflects the same quality level as the previously established general medicine program in Croatian.

### **2. DESCRIPTION OF THE STUDY PROGRAM**

#### 2.1. General information

Scientific/artistic area of the study programme	Biomedicine and health
Duration of the study programme	6 years
The minimum number of ECTS required for completion of study	360
Enrolment requirements and admission procedure	in accordance to public call requirements

#### 2.2. Learning outcomes of the study program (name 15-30 learning outcomes)

Learning outcomes of the study program will be determined in cooperation with other medical schools in Croatia (Zagreb, Rijeka, Osijek).

Upon graduation, graduated students acquire the following competences:

- Broad theoretical knowledge as well as practical skills, which qualifies them for further postgraduate education of any kind and cooperation with other experts

- Scientific way of thinking, which is a direct result of their scientific education
- Principles of medical ethics
- Graduate students are prepared for further development and growth of medicine
- Systematic thinking and structural approach to medical problems
- They meet the legal requirements for work in the medical field and further medical education and are ready to take responsibility that such work entails
- They mastered the diagnostic algorithm
- They are able to determine the correct diagnosis
- They are able to determine the correct treatment
- They are familiar with the structure, organisation and financing of the health field
- They are familiar with scientific and research methods
- They are capable to base their work on rational scientific concepts and principles
- They are familiar with theoretical concepts of biomedicine
- Have unbiased attitude towards new scientific methods in medicine
- They are ready to dedicate themselves to the medical profession and take responsibility for the patient's physical, mental and social well-being
- They treat patients with respect regardless of their gender, sex, race, social-economic status, education, culture, religion and worldview
- They respect the patient's right to decide independently on the course of their treatment including the right to reject the treatment or participation in scientific research
- They are capable to communicate with the patient in a way that the patient can understand them
- They empathise with patients
- They are ready to take responsibility and make necessary medical decisions
- They are familiar with health enhancement and prevention, which they are ready to promote in medical profession
- They have firm attitudes and awareness of personal limitations resulting from their prior education and experience
- They are ready to cooperate with other experts
- They are capable of establishing successful team work and managing skills
- They are aware of the necessity for continuing education in order to maintain high level of medical competence
- They are willing to teach their colleagues and develop their own teaching skills
- They are open to quality assurance methods and occasional estimation of their own medical competence and professional level
- They are ready to accept the evaluation results constructively since they include both positive and negative criticism
- They are ready to consider changes in socioeconomic context of treatments
- They meet all legal requirements related to continuing theoretical and practical education

#### 2.3. Employment possibilities

Upon graduation, the student employment is regulated with the Act on Medical Practice (Croatian National Gazette nb. 121/03 and 117/08). In order to practice medicine independently, Croatian doctor of medicine needs to hold a Croatian medical degree or an international recognized medical degree, pass state examination, register with the Croatian medical chamber and hold a medical licence for independent practising.

The doctor is obligated to renew his/her licence every six years. Upon passing the state examination or a few years of work in primary health care, many doctors choose a clinical, preclinical or public health specialities after which they can choose a subspecialty. Doctors can attend and graduate from postgraduate studies, conduct clinical science research and become a teacher at our school of medicine. Fewer doctors choose scientific work in basic medical sciences. These doctors are obligated to enrol into a postgraduate program. Many of them become university teachers and few of them get employed by other science institutes.

#### 2.4. Possibilities of continuing studies at a higher level

Upon graduation, doctors of medicine have a right to enrol in a three year postgraduate study program (180 ECTS credits) in the field of biomedicine and health. They are eligible to enrol in other postgraduate studies in similar field according to regulations of each study program.

## 2.5. Name lower level studies of the proposer or other institutions that qualify for admission to the proposed study

It is not possible to enrol into general medicine program from any other lower level studies.

#### 2.6. Structure of the study

The academic year lasts from October 1<sup>st</sup> until July 15<sup>th</sup>, so that the prescribed number of teaching hours (5 500, XII semesters) can get realized without changing the advised number of 25-30 hours per week. The academic year is not divided into semesters, but rather teaching blocks for each course.

After the teaching block finishes, students get a couple of free days in order to revise for the exam (including weekends and holidays) after which the first examination period is organized. The number of free days is determined by the length of the course itself. The second examination period lasts from July 16<sup>th</sup> until July 31<sup>st</sup>. The third and fourth examination periods are in September. The forth exam term is always the Committee exam. A student who does not have 42 ECTS credits at the end of the academic year has to re-enrol into the same study year, and those who have 42-60 ECTS credits enrol into the higher year of their studies. Those courses that students fail to pass have to be attended again and the exam has to be retaken. Students have a right to enrol courses of the higher study year but the maximum number of total number of ECTS credits per year should be 60. Specific and general enrolment criteria are described in table 2.12., List of obligatory and elective courses.

#### 2.7. Guiding and tutoring through the study system

Consultations are the main form of guiding and tutoring through the study system and are organized for each course separately. In case of severe psychophysical students' problems, the Committee for teaching is responsible for their education and well-being.

#### 2.8. List of courses that the student can take in other study programmes

At this point, there is no such possibility.

#### 2.9. List of courses offered in a foreign language as well (name which language)

The entire study program is organized in the Croatian language as well.

#### 2.10. Criteria and conditions for transferring the ECTS credits

As we have previously stated, it is very difficult to find a partner international or national University where our students would be able to attend exact courses as in Split in a given time period.

Since medicine is a regulated profession and our study program is quite extensive (5 500 hours), it was not possible to find courses that our students would attend elsewhere and, consequently, ECTS credits that would get recognized by our medical school.

For that reason we have focused on giving students the opportunity to complete a part of classes during summer or in any other way. Such classes would get recognized as one elective course (2 ECTS credits).

Moreover, we will encourage students to complete obligatory classes outside the school whenever possible since the main aim is to recognize those courses including both ECTS credits and the grade.

### 2.11. Completion of study

Final requirement for completion of study	Final thesis □ Diploma thesis ⊠	Final exam □ Diploma exam ⊠				
Requirements for final/diploma thesis or final/diploma/exam	Requirement for diploma thesis submission is passing of all exams, and requirement for diploma exam is completion of Clinical rotation: Medical Emergencies					
Procedure of evaluation of final/diploma exam and evaluation and defence of final/diploma thesisThe quality of graduation thesis and public thesis defense graded. Graduation thesis quality is graded with 0-50 points, public thesis defense is graded with 0-50 points. Grades: sufficient 56-65 points, good 66-75 points, very go

Grading and evaluating student work in class and at the final exam	The course exam has three components: continual formal written evaluation of 1) knowledge and 2) skills and 3) an integrated written test at the end of the course. All course assignments are graded, and the final score ranges from 0 to 100% so that 60% of the score comes from the evaluations during the course and 40% from the final written test. Grades are awarded according to the following criteria: 0-55 - fail, 56-65 - satisfactory, 66-75 - good, 76-85 - very good, $\geq$ 86 - outstanding.

		COURSE	E DESCRIPTION							
Course enrolment requirements and entry competences required for the course		Passed exams from the first year of the Program.								
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	cardiovascular, respiratory, kidney, gastrointestinal and endocrine system at the level of the cell, organ and whole body. Describe, discriminate and explain control mechanisms (negative and positive feedback loops) critical for homeostasis. Name and explain changes that occur in each system as a consequence of deviation of parameters within and outside of physiological limits. Critically judge educational materials (textbooks and lectures), participate in argumentative discussions and construct opinions. Apply adopted knowledge to predict function of system in the future. Compare similarities and differences in function between different systems in our body. Use acquired theoretical knowledge for solving practical problems. Perform and practice measurement of selected physiological parameters, and explain collected results. Construct and analyze diagrams showing relations between two or more									
Course content broken down in detail by weekly class schedule (syllabus)	parameters, predict behavior of the system in changed conditions.Lectures (30 hours):Number of hours:1. Course enrolment requirements and entry competences required for the course		-	rdinance on Studying.					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	of qualit medical students medicin Specific a) ident new kno	Students will acquire knowledge and skills in evidence-based medicine, assessment of quality in health care, research methodology relevant for medical practice, use of medical information, and use of statistical methods in medicine. This will develop students' competencies for critical assessment of their work and decision making in medicine, research and use of sources of evidence. Specific competencies include: a) identifying and understanding sources of knowledge and paths of communicating new knowledge in medicine and health care, b) understanding of different types of study design,						

	c) critical assessment of evidence and research data, d) understanding and use of basic statistical terms, definitions and methods,								
	e) understandin	g evidend	ce based med	dicine principles	, and	netno	bas,		
Course content broken down in detail by weekly class schedule (syllabus)	The course inte medical statistic medicine, and 5 areas, integrate organized as te	) responsible conduct of research and research integrity. he course integrates topics from the following fields: 1. medical informatics, 2. hedical statistics, 3. principles of research, 4. principles of evidence based hedicine, and 5. principles of assessing quality of health care. For each of the 5 reas, integrated into logical units, the teaching includes 2 h lectures, 3h seminars rganized as team learning and 5 h practical work organized as problem-base earning (a total of direct student teaching: 10 h lectures, 15 h seminars and 25 h

	COURSE DESCRIPTION								
Course enrolment requirements and entry competences required for the course	Successful completion of the	e 4th year of the Program.	. Passed	exam ir	n BLS.				
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	<ol> <li>Describe and explain gen and pharmacokinetics.</li> <li>List the most important mechanism of action.</li> <li>Name and explain the wa well as side-effects of va subgroups.</li> <li>Calculations of drugs dost</li> <li>Identify, describe and neuromuscular, cardiovascu</li> </ol>	drugs in anesthesia an y of administration, indica irious drugs representing age explain the most imp	tions and miscell	them a d contrai laneous characte	accordin indication groups eristics	g to ns, as s and of			

	system.								
Course content	<ul> <li>6. Describe, differentiate and explain control mechanisms (negative and positive feedback loops) critical for homeostasis of the human body during anesthesia procedures and intensive treatment.Describe, differentiate and explain conducting of anesthesia procedures. Especially perform differentiate and explain conducting general anesthesia.</li> <li>7. Describe, differentiate and explain management of treatment procedures in Intensive care units. Especially differentiate and explain characteristics of treatment of various organ failures.</li> <li>8. Describe, differentiate and explain conducting of procedures for various painful situations, especially differentiate treatment of acute and chronic pain.</li> <li>9. Describe, differentiate and explain procedures of vital signs monitoring. Basic and advanced. Describe, differentiate and explain procedures of basic and advanced life support.</li> <li>10. Describe, differentiate and explain procedures of organ donation and transplantation.</li> <li>A student should acquire the theoretical and practical knowledge of BLS and ALS, theoretical knowledge of clinical findings, monitoring and treatment of victims of intoxication, patients with multiple trauma, multiorgan failures and life threatening infections as well as of emergencies due to physical agents. S/he will also develop the theoretical knowledge of anesthesia procedures including types and choice of anesthesia, basic pharmacology of agents used in anesthesia, therapy of pain, reanimatology and intensive care.</li> </ul>								
Course content broken down in detail by weekly class schedule (syllabus)	History and theories of anesthesia. Pathophysiology of multiple organ failures. Reanimatology and intensive care of critically ill or injured patients. Anesthesia procedures. Pharmacology of agents used in anesthesia, intensive care and treatment of pain. Basic information on organ harvesting, and therapy of pain.

Identification of building	Hostel for visiting professors and restaurant, C building
Location of building	Šoltanksa 2, Križine, Split
Year of completion	2014
Total square area in m2	1531
Identification of building	Pathology and anatomy complex (PAK)
Location of building	Spinčićeva 1, Firule, Split
Year of completion	1986
Total square area in m2	2800

_	
Course	Teachers and associate teachers
Anaesthesiology and Intensive Medicine	Doc. dr. Nenad Karanović
	Doc. dr. Mladen Carev
	Doc. dr. Marko Jukić
	Doc. dr. Mihajlo Lojpur
	Dr. sc. Vjera Marinov
	Dr. sc. Božena Ivančev
	Dr. sc. Ivan Agnić
	Mr. sc. Božidar Duplančić
	Mr. sc. Dragica Kopić
	Mr. sc. Željko Ninčević
	Mr. sc. Dubravka Kocen
Anatomy	Prof. dr. Ivica Grković
	Prof. dr. Ana Marušić
	Prof. dr. Katarina Vukojević
	Doc. dr. Natalia Filipović
	Dr. sc. Antonia Jeličić-Kadić Milka Jerić, dr. med.
Basic Neuroscience	Ana Vuica, dr, med. Doc. dr. Renata Pecotić
Dasic Neuroscience	Prof. dr. Zoran Đogaš
	Prof. dr. Ivica Grković
	Prof. dr. Maja Valić
	Dr. sc. Ivana Pavlinac
	Linda Lušić, mag. psih.
	Ivona Stipica dr. med.
Basics of Med. Microbiology and Parasitology	Prof. dr. Marija Tonkić
Dasies of med. Microbiology and Farasitology	Prof. dr. Marinko Dobec
	Doc. dr. Ivana Goić Barišić
	Dr. sc. Katarina Šiško Kraljević
	Anita Novak, dr. med.
	Žana Rubić, dr. med.
	dr. sc. Vanja Kaliterna
	Merica Carev, dr. med.
	Marina Radić, dr. med.
Clinical microbiology and parasitology	Prof. dr. Marija Tonkić
37	Doc. dr. Ivana Goić-Barišić
	Dr. sc. Katarina Šiško-Kraljević
	Novak Anita, dr. med.
Clinical Oncology	Prof. dr. Eduard Vrdoljak
	Marijo Boban, dr. med.
	Tomislav Omrčen, dr. med.
	Mr. sc. Branka Petrić Miše
Clinical rotation: Internal Medicine	Doc. dr. Vedran Kovačić
Clinical rotation: Medical Emergencies	Prof. dr. Julije Meštrović
Clinical rotation: Mother and Child	Prof. dr. Marijan Saraga
Clinical rotation: Surgery	Doc. dr. sc. Davor Todorić
Clinical skills I, II	Doc. dr. Marko Jukić
	Doc. dr. Nenad Karanović
	Doc. dr. Mladen Carev
	Doc. dr. Mihajlo Lojpur
	Mr. sc. Branka Polić

## 3.2. List of teachers and associate teachers

	Dr. sc. Irena Zakarija-Grković
	Mr. sc. Božidar Duplančić
	Mr. sc. Dragica Kopić
	Radmila Majhen-Ujević, dr. med.
Clinical skills III - Clinical propedeutics	Prof. dr. Izet Hozo
	Prof. dr. Damir Fabijanić
	Prof. dr. Viktor Čulić
	Prof. dr. Maja Radman
	Doc. dr. Duška Glavaš
	Doc. dr. Damir Bonacin
	Doc. dr. Irena Perić
Croatian Language I, II	Josip Lasić, prof.
Dermatovenerology	Prof. dr. Neira Puizina-Ivić
	Prof. dr. Dujomir Marasović
	Dr. sc. Deny Anđelinović
	Antoanela Čarija, dr. med.
	Damir Pezelj, dr. med.
	Ranka Ivanišević, dr. med.
	Olga Kosor, dr. med.
Diploma thesis	Prof. dr. Ante Tonkić
Epidemiology	Prof. dr. Ozren Polašek
Lpideimology	Doc. dr. Ivana Kolčić
	Prof. dr. Rosanda Mulić
	Doc. dr. Mladen Smoljanović
	Dr. sc. Iris Jerončić
Family Medicine	Dragomir Petric, dr. med.
	Prof.dr. Mirjana Rumboldt
	Doc. dr. Ivančica Pavličević
	Doc. dr. Davorka Vrdoljak
	Mr. sc. Milan Glavaški
	Dr. sc. Nataša Mrduljaš-Đujić
	Dr.sc.Irena Zakarija-Grković
	Jadranka Giljanović-Perak, dr. med.
	Marin Rojnica, dr. med.
	Marion Kuzmanić, dr. med.
	Marko Rađa, dr. med.
	Dubravka Bačić, dr.med.
	Vanja Viali, dr.med.
	Ljubica Pavelin, dr. med.
	Liza Ćurčić, dr.med.
Forensic Medicine	Prof. dr. Marija Definis Gojanović
	Prof. dr. Davorka Sutlović
	Dr. sc. Kristijan Bečić
Gynaecology, Obstetrics and Reproductive	Prof. dr. Deni Karelović
Medicine	Prof. dr. Tomislav Strinić
Medicine	Prof. dr. Damir Roje
	Doc. dr. Boris Bačić
	Doc. dr. Jelena Marušić
	Doc. dr. Martina Šunj
	Doc. dr. Mirjana Vučinović
	Doc. dr. Marko Vulić
	Doc. dr. Marijan Tandara
	Dr. sc. Tanja Vukušić-Pušić Mr. sc. Zoran Meštrović
	Srđan Vuković, dr. med.
	Ivana Alujević Jakus, dr. med.
	Sandra Benzon, dr. med.
	Zdeslav Benzon, dr. med.

[	
	Ivanka Antončić Furlan, dr. med.
	Marija Bucat, dr. med.
	Mr. sc. Vesna Pavlov, dr. med.
	Tamara Bošnjak, dr. med.
	Vedran Hrboka, dr. med.
	Indira Kosović, dr. med.
	Zrinka Maleš, dr. med.
	Ante Mršić, dr. med.
	Kristijana Novak-Ribičić, dr. med.
	Sanja Srdelić Mihalj, dr. med.
	Žana Stanić, dr. med.
	Tomislav Prskalo, dr. med.
	Dinka Šundov, dr. med.
Health care argonization and health accommiss	Prof. dr. Ozren Polašek
Health care organization and health economics	
	Prof. dr. Rosanda Mulić
	Doc. dr. Mladen Smoljanović
	Doc. dr. Ivana Kolčić
	Doc. dr. Nataša Boban
	Dr. sc. Iris Jerončić
Histology and Embryology	Prof. dr. Livia Puljak
	Prof. dr. Damir Sapunar
	Prof. dr. Mirna Saraga Babić
	Doc. dr. Snježana Mardešić
	Doc. dr. Sandra Kostić
	Svjetlana Došenović, dr. med.
Immunology and Medical Genetics	Prof. dr. Janoš Terzić
	Prof. dr. Ivana Marinović Terzić
	Doc. dr. Ivana Novak Nakir
	Prof. dr. Vida Čulić
	Dr. sc. Jelena Korać Prlić
	Dr. sc. Boris Mihaljević
	Marina Degoricija
	Mija Marinković
Infectology	Prof. dr. Ivo Ivić
Internal Medicine	Prof. dr. Miroslav Šimunić
	Prof. dr. Dragan Ljutić
	Prof. dr. Dušanka Martinović-Kaliterna
	Prof. dr. Izet Hozo
	Prof. dr. Jugoslav Bagatin
	Prof. dr. Ante Tonkić

## 3.3. Curriculum vitae of the course teacher

First and last name and title of teacher	Nenad Karanović, assistant-professor
The course he/she teaches in the	Anesthesiology and Intensive Medicine
proposed study programme	Anestnesiology and intensive Medicine
GENERAL INFORMATION ON COU	RSE TEACHER
Address	Poljička cesta 7, 21000 Split
Telephone number	091 51 77 880
E-mail address	nkaranov@yahoo.com
Personal web page	none
Year of birth	1955.
Scientist ID	275856
Research or art rank, and date of last rank appointment	Senior scientific associate, 2013
Research-and-teaching, art-and-	Assistant-professor, 2010.
teaching or teaching rank, and date	
of last rank appointment	
Area and field of election into	Anesthesiology and Intensive Medicine
research or art rank	
INFORMATION ON CURRENT EMP	
Institution where employed	University Hospital Centre Split,
	University of Split School of Medicine
Date of employment	1981. 2006.
Name of position (professor,	Staff anestehsiologist and intensivist
researcher, associate teacher, etc.)	
Field of research	Anesthesiology and intensive care, Neuroscience
Function	Head of the Department
	Head of the Department

## 3.4. Optimal number of students

Optimal number of students per year is 50.

## 3.5. Estimate costs per student

Estimated student's costs per academic year approximately equal 52 500 kunas/ 7 000 EUR (tuition fees).

## 3.6. Plan of procedures of study programme quality assurance

In keeping with the European standards and guidelines for internal quality assurance in higher education institutions (according to "Standards and Guidelines of Quality Assurance in the European Higher Education Area") on the basis of which the University of Zagreb defines procedures for quality assurance, the proposer of the study programme is obliged to draw up a plan of procedures of study programme quality assurance.

Documentation on which the quality assurance system of the constituent part of the University is based:

• Regulations on the quality assurance system of the constituent part (enclose if existing)

• Handbook on the quality assurance system of the constituent part (enclose if it exists)

Description of procedures for evaluation of the quality of study programme implementation:

- Fore each procedure the method needs to be described (most often questionnaires for students or teachers, and self-evaluation questionnaire), name the body conducting evaluation (constituent part, university office), method of processing results and making information available, and timeframe for carrying out evaluation
- If procedure is described in an attached document, name the document and the article.

Evaluation of the work of teachers and part-time teachers	The process of student evaluation of teaching is conducted by the Centre / Department for quality in cooperation with the Committee for quality improvement of the departments. The procedure consists of: informing students and teachers, student questionnaire surveys, questionnaire analysis and presentation of results and measures for improving quality. The procedure is described in detail in the Guidelines for conducting student evaluation of teaching, University of Split. Survey is conducted on the last day of each teaching cycle. Analysis and delivery of survey results is the responsibility of the Centre / Department for the quality. Summary of the results for each department are presented to the Dean and to the President of the Committee for Quality Improvement. After analyzing the results of student surveys, dean holds informative meetings with the 10% of the worst-rated teachers and informs the

	Rector. Also, departments that have received lower ratings hold meetings on improving the quality of teaching. Our School, in accordance with the Regulations on rewards and recognition, rewards each year best teachers, associates and departments according to the results of student surveys.
Monitoring of grading and harmonization of grading with anticipated learning outcomes	The assessment of students at our School is carried out during classes (continuous evaluation) and during the exams. In student assessment the compliance of literature and teaching, as well as literature and the contents of the exam is particularly important. On the School website, under "Department" the curriculum of each department is specified. All teachers are listed in tables along with teaching schedules and units accompanied by chapters from books that are required reading. For written exams,
	scoring systems are explained in detail. Everything listed above contributes to the organization and execution of teaching, and to better communication with students. The assessment of the acquired knowledge through written exams has become the standard that is applied to all School programs. Committee for teaching, Committee for supervision of the teaching and Committee for Quality Improvement are all involved in the monitoring of the implementation of these procedures.
Evaluation of availability of resources (spatial, human, IT) in the process of learning and instruction	Evaluation of the availability of resources is partly carried out through a questionnaire for student evaluation of expert and administrative services and partly through the
	evaluation of the overall study program. Evaluation is conducted by the Department / Centre for Quality in cooperation with the Committee for Quality Improvement. The survey is conducted at the end of each academic year. The data is processed and the results are submitted to the Department for quality.
Availability and evaluation of student	After enrolling in the first year, each student is assigned an advisor. The goal of this feature is providing assistance and guidance to students in order to master curriculum as easy as possible. As instructed by the dean and the vice dean for
support (mentorship, tutorship,	education, student representatives , analyze and timely
advising)	inform the Dean's Office and the department if one of the students has encountered the problem with the successful completion of each examination in order to ensure timely response. We do not have formal way to evaluate support to students.
	The process of monitoring student rate of transition is conducted by the Centre / Department for quality using a
Monitoring of student pass/fail rate by course and study programme as a	questionnaire filled out by the School. This activity is carried

whole	out once a year at the beginning of the academic year for the previous academic year. Also, our School carries out
	internal analysis of students for each subject, exam and

	program after the first exam period, and before the autumn exam period, and the end of the academic year. The procedure is implemented by Student administration, Office for teaching and the departments. The results of rate of transition are discussed in the meetings of the Committee for teaching.
Student satisfaction with the programme as a whole	The process of student evaluation of the entire study program is conducted by the Department for quality in cooperation with the Committee for Quality Improvement and Student administration. This procedure is carried out electronically using EVASYS platform after the defense of the final thesis, and the data processing is conducted by the Department for quality. The results are submitted to the Dean and to the President of the Committee for Quality Improvement. The results of the survey are discussed among dean and vice deans, the Committee for teaching and the Committee for Quality Improvement.
Procedures for obtaining feedback from external parties (alums, employers, labour market and other relevant organizations)	Establishment of the alumni association is in progress. The School is in contact with the Croatian Medical Chamber, the Croatian Employment Service (regional office Split) and other stakeholders, and follows the trends and rates of employment of the staff we train.
Evaluation of student practical education (where this applies)	not applicable
Other evaluation procedures carried out by the proposer	/
Description of procedures for informing external parties on the study programme (students, employers, alums)	On the School of Medicine, University of Split website (www.mefst.hr) all necessary information on study programs, admission requirements and enrollment quotas are provided. Our opinion is that personal contact with potential students is very important and we attend the "The University Fair" each year. We are broadening the presentation of our School by participating in numerous festivals such as "Summer Science Factory", "Festival of Science", "Brain awareness weak" since such events are often attended by prospective students. A significant contribution to presentation of our School is brought by the Herald published by the staff and the students of the School biannually since 2007. We also published the "First student guide for freshmen." These publications, although intended for students already enrolled, can serve as an excellent source of information for all concerned.
