Why did you decide to go to University?

In order to prepare yourself for what comes next, the future.
And the future is the real world.

At Universidad Europea, we focus on the **professional** that you want to be and on providing you with a **practical training** that enables you to work on your future from day one.

We call for your own **progress and development**, for you to go beyond, offering you the help you need but never forgetting that you are in the driving seat.

This makes Universidad Europea **more than just a university**.
And you **more than just a student**.

Go beyond

You will be put to the test on campus with challenges, projects and gamification. You will also do an internship to train as a global professional.

Universidad Europea's
Certifications.

Area

There are questions that heal.

All of us who make up this Faculty are aware that we are training health professionals in an exciting time for our field.

We know very well that we train professionals who will promote the change of multiple paradigms, finally giving an answer and finding long-awaited cures. In this context, the disruptive DNA of our university still has more relevance: why if health professionals they work together, they do not learn to interact together internalizing from the beginning the role that each one adopts before a clinical or emergency situation? Why if health is a practical field takes so long to “practice”? Why if ideas and innovation are key in this field, we do not learn to start projects? Why if reality is going to demand both knowledge and skills, are these evaluated separately? There are questions that heal.

Learning by doing.

“Learning by doing” at the Faculty of Health means working in simulated scenarios where going wrong is not a problem, but an opportunity to gain confidence and learn. It is to understand that you have to be present in reality, and the reality is that in the future you will not work alone, but side by side with other health professionals.

- You relate theory and practice to favor a comprehensive vision and better assimilation.
- They evaluate you objectively to ensure that you acquire your skills.
- You experiment with professional practices.
- If you wish, you can live international experiences.

Bachelor's Degree in Dentistry

Do you want to take care of smiles?

Dentistry is advancing by leaps and bounds. Scientific and technological advances are transforming this profession. Professionals in this field have to be prepared to meet expectations and needs that society is going to demand and we will show you how.

That is why the Universidad Europea de Valencia is committed to training based on new teaching methodologies and by the application of the latest technologies, experimenting sensations almost identical to those you will have in a real patient or in our simulated environments where you prepare to act in any situation or emergency unexpected.

Knowledge, innovation and clinical practice.

In their clinical preparation, students are trained in the latest trends and techniques in the dental field, use the most advanced technological resources and with the support

of teachers with a great clinical experience, perform the diagnosis and comprehensive treatment of their patients, thus offering them the highest quality of care.

	LOCATION Valencia		MODALIDAD On campus
	STARTING September		DURACIÓN 5 years
	LANGUAGE 1st, 2nd and 3rd year: English 4th and 5th year: Spanish		ECTS 300

What makes us different?

Bachelor's Degree in Dentistry

Advanced technology

Develop your skills and abilities in our medium and high-fidelity dental simulation laboratories. Ensure quality treatment in a safe life-like environment before treating a real patient.

You will also be given access to the digital Smart Lab -a first of its kind in Spain- which will allow you to carry out virtual simulations to increase your skills, as well as your ability to adapt seamlessly when working in real situations.

Internships in our clinics

Starting in your fourth academic year, you can complete an internship in our University Dental Clinic. You will treat both adult and pediatric patients from day one of your clinical activity.

Unique Facilities

Acquire from the beginning the skills and abilities necessary for patient care in our Dental Simulation Laboratory-Workshop, a safe and true-to-reality environment, where you learn to deal with multiple simulated clinical and even emergency situations, learning to interact with other students in the area of health and to make correct decisions.

Prestigious Faculty

All your professors are practicing professionals with demonstrable work, teaching and research experience in all areas of dentistry. They combine in-depth training with approachability and motivation to help you achieve your best academic and professional performance and to familiarize you with the real professional world.

Innovative learning model

Through active and collaborative learning methodologies: flipped classroom, role playing, case method, problem-based learning, oral presentations, forums, virtual campus technological tools, etc.
